IDENTIFIERS *Arkansas

ABSTRACT

Information on the geographic and institutional origins of students at Arkansas state and private colleges and universities in fall 1984 is presented in tabular, geographic, and narrative form. Entering students numbered 13,072 in fall 1983, a 3.32% decline from the fall 1982 figure of 13,521. The college-bound rate of Arkansas high school graduates increased from 38.2% in 1982 to 39.3% in fall 1983. A total of 6,131 undergraduates transferred from both in-state or out-of-state institutions to Arkansas colleges. Arkansas residents comprised 86.5% of fall 1983 undergraduates. Although the total number of foreign students did not change significantly from fall 1982, the state four-year institutions showed a slight numerical increase (1,004 in 1983 and 977 in 1982) in undergraduate foreign students. A significant number of students enrolled as graduate students at the institution from which they received their baccalaureate degrees. For each college and university, information is provided on the geographic origin of undergraduate students (county and state). In addition, for each college and university, ratios of fall full-time, entering undergraduates to high school graduates are presented by county. (SW)

Luck, Arkadelphia; Mrs. Carolyn McGowan, Fort Smith; Sheffield Nelson, Little Rock; Dan Pierce, Jonesboro; Clifton G. Roaf, Pine Bluff.

FOREWORD

The Arkansas Department of Higher Education (ADHE) annually publishes this analytical report based on the data collected through the Arkansas Higher Education Information System (AHEIS). The ADHE staff appreciates greatly the cooperation of the Institutional personnel who prepare these reports. Without those individuals, the ADHE series of analytical reports would be impossible. We are particularly pleased with the high degree of participation by the Independent Institutions. Because of this cooperation, AHEIS is one of the few statewide information systems to cover all institutions of higher education. Additionally, for the first time since the initiation of this series four years ago, the institutions provided relatively complete data for analyzing patterns in the number and origin of graduate and first professional students.

This report was prepared by Mark A. Byrd with the assistance of John R. Spraggins. The ADHE production division, supervised by Mary Griebel, provided assistance in preparing the various tables and readying the text for final publication. The ADHE staff invites suggestions on how we might improve this report in future editions.

Gary D. Chamberlin
Director

EXECUTIVE SUMMARY

This report provides information to the state and independent institutions with the intent of evoking thoughts and actions in response to trends in Arkansas higher education. Administrators should continue to develop policies designed to reduce the institutional impact of the inevitable decline of traditional college age first-time-entering students. Better understanding of the changes in the state's demographic makeup will facilitate establishment of effective policy.

First-time-entering students numbered 13,072 in fall 1983; this is a 3.32% decline from the fall 1982 figure of 13,521. The college-going rate of Arkansas high school graduates increased from 38.2% in 1982 to 39.3% in fall 1983. This resulted in an increase from the previous year of 817 students. The increase occurred in spite of a decrease by 88 in the number of out-of-state students enrolled in fall 1982. The total number of foreign students did not change significantly from fall 1982. Nevertheless, the state four-year institutions showed a slight numerical increase -- 1,004 in 1983 and 977 in 1982 -- in undergraduate foreign students.

A total of 6,131 undergraduates transferred from both in-state or out-of-state institutions to Arkansas colleges this year. This is only a slight reduction from the 6,176 transferring students in fall 1982 and could probably be accounted for in the data not received from Harding University and Philander Smith College. Only the state four-year institutions had gains outweighing losses with University of Arkansas - Fayetteville (UAF) receiving and sending the largest number of transfers.

The number of graduate students at Arkansas State University - Jonesboro, University of Arkansas - Fayetteville, and University of Arkansas at Little Rock (UALR) appear to have increased significantly from 1982; however, this rise results from more thorough reporting by UAF and UALR. Furthermore, the data show that a significant number of students enrolled as graduate students at the institution from which they received their baccalaureate degrees.

GEOGRAPHIC AND INSTITUTIONAL ORIGIN OF ARKANSAS
COLLEGE STUDENTS, FALL 1983

This report provides a summary and analysis of the geographic and institutional origins of the students attending Arkansas colleges and universities during the fall of 1983. The data were collected through the Arkansas Higher Education Information System (AHEIS) in cooperation with all public and independent institutions throughout the state. Although definitions of concepts are given when they first appear, a glossary is provided in Appendix B for your immediate referral. Appendix C provides a list of the names and corresponding abbreviations for each of the Arkansas colleges and universities.

Appendix A provides an analysis of the major draw areas for each institution with regard to full-time, first-time-entering undergraduates as a percentage of high school graduates by county. This is of particular use in determining the major losses or gains in draw area by the individual institutions.

ORIGIN OF FIRST-TIME-ENTERING UNDERGRADUATE STUDENTS

FIRST-TIME-ENTERING UNDERGRADUATE STUDENTS

Much has been written about the decline in the number of first-time-entering undergraduate students on both state and national levels. This decline results, in part, from the movement through college of the last of the post-war baby boom children. According to the National Center for Education Statistics (NCES), the projected 1983 national enrollment of ninth through twelfth graders has declined by 2%, using 1982 as a base year, and by 1990 the projection indicates a 12.63% decline. NCES has this decline continuing until 1992 at which time the national enrollment of ninth through twelfth graders is expected to begin rising. One might surmise that projections of the number of college-bound students based on the figures presented above might be misleading. It should be realized, however, that the number of students presently enrolled in these grades plays a dominant role in predicting the future size of the traditional college-age population.

The category of first-time-entering undergraduate students includes those enrolled in the fall term who entered college for the first time in the prior summer term and students who entered with advanced standing via credit through CLEP tests. In fall 1983 a total of 13,072 full-time, first-time undergraduates entered Arkansas colleges and universities. This number was down from the fall 1982 and 1981 years by 3.32% and 5.83% respectively.

Table 1 displays the geographic origin of full-time, first-time-entering students for fall 1983. Eighty-five percent of the first-time enrollees were Arkansas residents, up slightly from 84% the previous two years. The four-year state institutions received the highest percentage of their total first-time enrollees from Arkansas (89%), while the independent four-year institutions enrolled 59% of their total first-time undergraduate enrollees from within the state. State two-year institutions experienced the only increase -- 2,347 in 1982 and 2,407 in 1983 -- in first-time enrollees of all the state and independent institutions. The inclusion for the first time of figures for Rich Mountain Community College, which enrolled 81 first-time entering undergraduates, accounts for this increase. Even with Rich Mountain's numbers included in the data, the total number of out-of-state enrollees dropped by 15. In all, only 15% of the total full-time, first-time-entering undergraduate students came from out-of-state -- this is a one percentage point decline from a historically stable sixteen percent (fall 1980 to fall 1982).

Figure 1 displays the full-time, first-time-entering undergraduates by county of origin as compared with fall 1982. The largest numerical increase over fall 1982 came from Polk county with 67 more high school graduates attending Arkansas colleges. The second largest increase came from St. Francis county with 47. The largest numerical decrease came from White county with 84 fewer graduates entering Arkansas colleges from that county. In fall 1983, 39 of Arkansas' 75 counties showed a decline in the number of high school graduates entering college for the first time, with two counties showing no change over fall 1982.

FIGURE 1. FULL-TIME FIRST-TIME ENTERING UNDERGRADUATE STUDENTS
BY COUNTY OF ORIGIN, FALL 1982 AND FALL 1983*

* First Number = Fall 1982
Second Number = Fall 1983

INSTITUTIONAL DRAW AREAS

The State Board of Higher Education defines "Institutional draw area" as the counties from which a given institution draws 3% or more of the high school graduates. The institution's percentage draw in each county is determined by dividing the actual number of fall full-time, first-time-entering undergraduate students by the total number of individuals who graduated from high school in those same counties the previous spring. By looking at the draw area data from years past, administrators could identify trends and establish appropriate recruiting policy.

Draw area calculations also play an important role in the ADHE funding process. ADHE assumes a relationship between the number of high school graduates in an institution's draw area and the number of full-time, first-time-entering students enrolling at that institution the next fall semester. Using information provided by the Arkansas Department of Education, the ADHE staff projects high school graduation figures for all institutions' draw areas. For each college and university, the high school graduation projection serves, along with a factor derived from historical data, as the basis for projecting full-time, first-time-entering enrollment. This specific projection represents an important component in the overall enrollment projection equation. Enrollment projections drive several parts of the funding formula including those dealing with faculty salaries, departmental operating expenses, libraries, academic support, scholarship, research, public service, and portions of institutional support and the auxiliary transfer.

Not all of the first-time enrollees are recent high school graduates; nevertheless, 84% come from the 17 to 19 age group. Administrators should anticipate a shift in the student composition within their institutions in coming years. In a report prepared by NCES, Projections of Education Statistics to 1990-91, researchers predict that by the year 1990 the baby boom generation will dominate the 25-34 and 35-44 age groups. And while the enrollment of students less than 25 years old is expected to drop by 15% in the 1980's, NCES forecasts that the enrollment of students 25 years old and over will offset somewhat the diminution in the traditional college-age cohort. Although NCES predicts an increase in older students, this increase is not a given for all colleges and

universities. Policy needs to be developed and implemented to attract these students. Evaluation of community needs must be made to provide a direction and focus for policy goals. For example, realization of an increase in the number of part-time students has to be a factor to be considered for the scheduling of evening and weekend courses.

Table 2 displays by Institution the fall 1983 first-time-entering undergraduates as a percentage of 1983 high school graduates from each county. Figure 2 presents the fall full-time, first-time-entering Arkansas college freshmen as a percent of previous spring Arkansas high school graduates by county. These numbers correspond with the percentages listed in the far right column on Table 2. In fall 1983, 39.3% of the Arkansas high school graduates entered college as full-time, first-time-entering students (the major assumption made in determining college going rate in Arkansas is that the number of students leaving the state for other institutions equals the number of students entering the state to attend Arkansas colleges and universities). This figure exceeds the 1982 count by slightly over one percentage point and almost matches the 39.6% of 1981 (see Figure 3).

Figures for the state four-year institutions fluctuated in terms of the number of counties from which they drew at least 3% of the high school graduates, as shown in Table 3. ASUJ picked up three more counties, while ATU lost three counties from the year before. There was not much change in the two-year state institutions with the exceptions of SAUT, up three counties, and EACC, up two counties. Similarly, the Independent four-year institutions did not change much from the previous year with the exception of OBU, which lost four counties. Figures A-1 to A-4, in Appendix A, graphically display that most of the institutions drew from nearby counties. Only UAF and UCA drew from a wide area throughout the state.

TABLE 2. FALL 1983 FULL-TIME FIRST-TIME-ENTERING UNDERGRADUATES AS A PERCENTAGE OF 1983 HIGH SCHOOL GRADUATES BY COUNTY

GEOGRAPHIC ORIGIN OF UNDERGRADUATE STUDENTS

County of Origin

Figure 4 displays the county of origin, fall 1983, of Arkansas residents enrolled in Arkansas colleges and universities as undergraduate students. As expected, Arkansas residents comprised 86.5% of the fall 1983 undergraduate students. A total of 871 more state residents enrolled than in fall 1982. This represents a 1.5% increase.

In Appendix A, Tables A-1 and A-2 provide respectively the fall 1983 and fall 1982 geographic origin of Arkansas undergraduate students by school, broken down by county and state. Total enrollment at the state two-year institutions increased 6% from 1982 to 1983. The major contributor to this increase was, again, Rich Mountain Community College, included for the first time in the fall 1983 report and adding a total of 293 head count to the fall enrollment. State four-year institutions had the second largest increase in in-state enrollment, up 324.

State of Origin

Figure 5 displays the slight decrease in out-of-state residents enrolled in Arkansas colleges and universities. The in-migration of 8,973 represented only 13.26% of the total Arkansas undergraduate enrollment. Of the states that in the past have contributed 300 or more students to the Arkansas enrollment, only Missouri increased its contribution. Texas, the other large contributor, sent 23 fewer students; similarly Illinois, Tennessee, Louisiana, and Oklahoma were attenuate in their decline of students sent. These six states contributed a total of 51% of the total out-of-state Arkansas college population.

Arkansas State University at Jonesboro (ASUJ) had the largest numeric increase in out-of-state students, up from 697 in 1982 to 810 in the fall 1983. Sixty-four percent of the 113 students came from Missouri. The other schools drawing the largest number of out-of-state students, Harding University (HU) 1,915 and University of Arkansas at Fayetteville (UAF) 1,634, experienced a decrease from the previous year (see Appendix A Tables A-1 and A-2).

The number of foreign undergraduate students as a total from all schools did not change significantly from fall 1982. Nevertheless, the state four-year institutions did show a slight numerical increase in undergraduate foreign students from fall 1982, with UAF's 427 leading the way, followed by ASUJ with 260, and UALR with 150 (see Appendix A Table A-1, A-2).

INSTITUTIONAL ORIGIN OF ENTERING UNDERGRADUATE TRANSFER STUDENTS

Table 4 discloses that a total of 6,131 students transferred from either in-state or out-of-state institutions to Arkansas colleges this year. This represents only a slight reduction from fall 1982's 6,176. The reduction came from a drop in the students reported in the "U.S. Territories" and "Unknown" categories. Also, it is very difficult to compare the numbers ADHE received this year with those of last year because of the lack of data -- the numbers presented in table 4 and table 5 probably are understated. This year, ADHE received no data from HU and PSC. There was a substantial increase in unknowns reported by WCC, and smaller increases reported by ASUJ and GCCC.

Table 5 presents the number of entering undergraduate transfer students sent to each institution in Arkansas from each other Arkansas institution in the fall 1983. The institutions listed at the top of the table are those that receive the students, and the colleges listed down the side are the sending institutions. Only ten institutions received more students than they sent. As a combined total of all colleges and universities within a category, only the state four-year institutions received more transfers than they sent.

Table 6 provides a summary of the figures for entering undergraduate transfer students among Arkansas institutions of higher education. Only the state four-year colleges had gains outweighing losses. The state two-year institutions saw the largest number of their transfers going to UAF, perhaps because of the proximity of both WCC and NACC to UAF.

INSTITUTIONAL ORIGIN OF GRADUATE AND FIRST-PROFESSIONAL STUDENTS

Graduate Students

Table 7 displays by institution the number of graduate students at each university. The major increases in graduate students occurred at ASUJ, UAF, and UALR. UAF had an increase of 940 students, and UALR gained 361. These numbers emerge as a result of more complete reporting this year by the two institutions. The zero-order of the matrix on Table 7 clearly shows that the majority of the students remain with the institution from which they graduate. One exception is UAMS where only 1.5% of their undergraduates remained -- this is explained by the nature of that institution's undergraduate program, being vocational rather than medical preparatory. Last fall UAF reported 88% of their graduate students under the unknown category. Similarly UALR recorded 76% of their students under this category. This year UAF and UALR showed marked reductions in unknowns reported (see Table 8).

First Professional Students

Currently three schools offer first-professional degrees in Arkansas: law schools at both UAF and UALR, and medicine and pharmacy at UAMS. Table 9 displays the breakdown of each of the three professional schools by the in-state institution that granted the students' most recent degrees. UALR showed an increase of 17 additional students while UAMS remained unchanged. UAF reported 173 more in-state students; this rise, again, resulted from more thorough reporting than in the previous years.

Table 10 displays the number of first-professional students enrolled in Arkansas institutions by the state that granted the students' most recent degrees. In comparison to the previous year, UALR and UAMS showed an increase in total number of first professionals while UAF experienced a decrease of 57 students. The decrease at UAF flows from an intentional administrative move to deal with the previous year's increase in first professionals in order to maintain its present level of staffing. In relation to the observation made

earlier about the UAF's ameliorated reporting, it should be noted that UAF still has the largest number of reported unknowns with 28.6% of its students being reported within this category.

APPENDIX B

APPENDIX B: GLOSSARY

Enrollment Status. A student's current attendance status in a post-secondary education institution. The following mutually exclusive categories will be used:

1. First-time-entering Undergraduate Student. A student entering any college for the first time ever. For reporting purposes, this category includes students enrolled in the fall term who entered college for the first time in the prior summer term and students who entered with advanced standing and may actually be classified beyond the freshman level at entry.
2. Entering Undergraduate Transfer Student. An undergraduate student entering the institution for the first time with academic credit attempted or earned at another institution (whether or not the credit is accepted by the institution to which the student transfers). For reporting purposes, this category includes students enrolled in the fall term, who first enrolled as transfer students in the prior summer term.
3. First-Time-Entering Graduate Student. A student who has been awarded an earned baccalaureate or first professional degree and who is entering any institution classified as a graduate level student for the first time. "Graduate Student" includes students enrolled at any level of graduate study - Master's, Specialist, or Doctoral.
4. First-Time entering First Professional Student. A student entering any institution classified for the first time as a first professional students. The student may have been enrolled as an undergraduate or graduate student at the reporting institution.

First-Time-Entering. Refers to a student's initial enrollment at an institution at a given general student level. See ENROLLMENT STATUS.

Geographic Origin. The legal residence of a student at the time of original admission to the institution. The following mutually exclusive categories will be used:

1. In-State. A student who attends a postsecondary education institution in the state in which he or she had legal residence at the time of original admission.
2. Out-of-State. A student who attends a postsecondary education institution outside of the state in which he or she had legal residence at the time of original admission. Foreign students are not included in this category.
3. Foreign. A student who attends a postsecondary education institution outside of the country in which he or she had legal residence at the time of original admission.

The in- and out-of-state student categories of this term should not be confused with "In-State Students" and "Out-of-State Students" as classified by Current Legal Residence. The former designations are for purposes of classifying a student's legal residence Upon first admission, while the latter are for classifying a student's current legal residence, usually for tuition-and-fee purposes in state-supported institutions.

Student Level. Refers to the proportion of total requirements a student has obtained, as of the census date, toward the completion of the degree/diploma or certificate program in which the student is enrolled. The following mutually exclusive student level categories will be used.

1. Lower Division. A student who a) is enrolled in a program(s), course(s) or study, or activity(ies) which leads to an associate degree (including three-year associate degree programs) or a bachelor's degree and has earned less than 60 semester credit hours; or b) is enrolled in an undergraduate occupational or vocational program(s) of three or fewer years' duration which results in formal recognition below the baccalaureate

degree. (Typically, this individual should be classified as a freshman or a sophomore.)

2. Upper Division. A student who a) is not in an associate degree or occupational/vocational program(s), b) is enrolled in a bachelor's degree program, and c) has earned 60 semester credit hours. (Typically, this individual is classified as a junior or a senior.) This category includes a student in years three, four, or five of a five-year bachelor's degree program.
3. Unclassified Pre-Baccalaureate. A student who cannot be classified into one of the categories above because he or she is not enrolled in a program of study leading to a degree/diploma or certificate, even though taking courses with regular students. This category does not include students who have been admitted to pursue a degree but have not yet declared a major. This category does include students who have received an earned baccalaureate degree, have not been accepted by the institution for graduate-level study, and are taking undergraduate-level courses, such as teachers taking courses for certification.
4. First Professional. A student who is enrolled in a first professional degree program. First Professional degrees offered in Arkansas are as follows:
 - a. Law, General (LLB or JD)
 - b. Medicine (MD)
 - c. Pharmacy (D Phar)
5. Master's. A student who has received an earned baccalaureate degree, has been accepted for graduate-level study and a) is enrolled in a master's degree program, or b) is enrolled in a doctoral program but has earned less than 30 semester credit hours in graduate course work.
6. Specialist. A student who has received an earned baccalaureate degree and is enrolled in a specialist degree program.

7. Doctoral. A student who has received a master's or specialist degree, or has earned at least 30 semester credit hours in graduate course work, and who is enrolled in a doctoral degree program.
8. Unclassified Post-Baccalaureate. A student who has been awarded an earned baccalaureate degree and who is eligible to enroll in credit courses at the graduate or other post-baccalaureate level but who cannot be classified into one of the categories above because he or she has not been accepted by the institution for graduate-level study.
